Leather Category II

- Slightly corrected leather, with a touch of pigment for easy care.
- European raw material from cattle.
- Natural and growth characteristics are visible.
- Pre-dyed in large colour drums, final colour is achieved with pigments.

Care and cleaning of semi-aniline leather

- For the care and cleaning of semi-aniline leather, only the specially developed care set should be used.
- In normal use, regular vacuuming with a non-sharp-edged nozzle or wiping with a cloth moistened with distilled water is sufficient.
- Our semi-aniline leather should be treated every six months with the care set available from specialist dealers
